SUMMARY

Senior full stack engineer and SaaS founder with 10+ years building and shipping production web apps end-to-end — from architecture to payments to go-to-market. Deep with React, Next.js, Node.js, and TypeScript; cloud experience across AWS and Firebase; hands-on AI/LLM integration with LangChain, Ollama, and OpenAI. Currently building two SaaS products. Remote-first and fully bilingual (English/Spanish).

PRODUCTS (FOUNDER)

Forzive — Co-founder & Full Stack Engineer

2024 – Present

[forzive.com](#) · Multi-tenant gym & studio management SaaS for owners across Central America.

- Architected and shipped a multi-tenant platform on Next.js 14, Prisma, and PostgreSQL, deployed on Vultr with Cloudflare wildcard DNS for per-gym public subdomains.
- Built the full product surface: membership management, QR check-in, class scheduling, payment processing, invoicing, and payment links.
- Integrated biometric door access (ZKTeco SpeedFace via ADMS/PUSH) through a custom multi-tenant API, enabling hardware-level check-in as a premium tier.
- Implemented real-time updates with PostgreSQL LISTEN/NOTIFY, Socket.io, and Redis pub/sub.

Playflow — Founder & Full Stack Engineer

2024 – Present

[playflow.games](#) · [playflow-games.com](#) · Tournament management platform for clubs and sports organizations.

- Built a full tournament app (brackets, scheduling, multi-category support) with React, Next.js, Node.js, and Firebase.
- Designed a TypeScript bracket-parsing schema that extracts large multi-category tournament structures.
- Implemented subscription billing with Stripe (tiered pricing, free trials) and a club/organization CRM.
- Shipped the marketing landing site ([playflow-games.com](#)) alongside the live app ([playflow.games](#)).

PROFESSIONAL EXPERIENCE

Full Stack Engineer — Qualpay

2024 – 2025

- Optimized real-time payment reporting and reconciliation tools, improving data accuracy and reducing operational friction for merchants.
- Enhanced backend performance and modernized an Angular + TypeScript frontend.
- Maintained and extended APIs supporting financial reconciliation on an enterprise-grade payments platform.

Senior Next.js Developer — Condoit

2023

- Solo-built an admin, project, user, and subscription management platform from scratch with Next.js (App Router), Stripe.js, and Chakra UI.
- Implemented role-based access, subscription management, and system integrations.
- Integrated TanStack Query & Table for performant, reactive data display.
- Deployed a production-ready SaaS UI in under 3 months as sole developer.

Senior React Developer — AnswersNow

2023

- Built a real-time scheduling platform for certified professionals with React and TypeScript.
- Integrated Stripe for secure payments; designed a responsive, accessible UI.
- Optimized PostgreSQL queries and indexing for significant backend performance gains.
- Ensured HIPAA-compliant data handling through cross-functional collaboration.

Vue.js Frontend Developer — InnovateTech Solutions

2022 – 2023

- Built an e-commerce dashboard and inventory system in Vue.js 3 (Composition API) serving 10,000+ daily active users.
- Implemented real-time inventory tracking, payment gateways, and data-viz components; managed state with Vuex.
- Optimized performance via lazy loading and code splitting.

Full Stack Developer — Various Companies

2013 – 2022

Mercer, PartnerHero, San Services, and others.

- Built CRM systems and real-time sales-tracking dashboards with React, Node.js, and Firebase.
- Introduced reusable component systems during early React adoption.
- Delivered custom admin tooling for operator performance management.

SKILLS

Frontend	React, React Native, Next.js, Vue.js, Angular, Redux, TypeScript, Tailwind CSS, Chakra UI, Bootstrap
Backend	Node.js, Python, C#, GraphQL, PostgreSQL, SQL, Prisma
AI / ML	LangChain, Ollama, LLaMA 3, OpenAI GPT, Hugging Face
Cloud & DevOps	AWS, Firebase, Docker, Vultr, Cloudflare
Integrations	Stripe, Twilio

EDUCATION

B.Sc. in Computer Science — Universidad Católica de Honduras (2009–2016)

CERTIFICATIONS

Advanced React — Wes Bos
Data Querying in React — ui.dev

LANGUAGES

English (fluent) · Spanish (native)
